www.specialty-products.com

Full Metal Jacket™ is a 100% pure polyurea that is applied hot to provide the strongest, most flexible protection in the industry. Full Metal Jacket™ is manufactured by Specialty Products, Inc. (SPI), the world's leading manufacturer of spray polyureas. Anything less than 100% pure polyurea compromises the strength and durability of your bedliner.

- ▶ Tensile Strength: 2800 psi
- ▶ Elongation: 360%
- ▶ Gel Time: ± 8 sec.
- ▶ Tack Free: ± 12-18 sec.
- ▶ Post Cure: 0-12 hours

MAJOR BEDLINER COMPANIES

PHYSICAL PROPERTIES

- Tensile Strength/Impact (Pounds Per Square Inch)
- Elongation/Stretch (Flexibility Percentage)
- Tear Strength/Damage (Rip, Breach, Gash)

Make Your Truck Like New

FMJ™ is the perfect way to restore the look of an older rig. Whether you have a well used or new truck, this is a great way to add resale value to your investment with a factory-like finish.

Resists Impact & Abrasion

FMJ™ is a tough, durable coating. It absorbs impact, remains flexible, and will not chip, crack, warp, peel, or tear.

Prevents Rust

FMJ™ creates a seamless barrier that locks out rust or corrosion.

Reduces Cargo Slippage

FMJ™ offers a consistent, non-slip, textured finish that helps keep loads in place, protecting your cargo and your truck.

No Lost Cargo Space

FMJ™ will follow the exact contours of your truck and will not affect your cargo capacity or interfere with the installation of accessories such as 5th wheel hitches, utility boxes, tonneau covers, and more.

Dampens Noise and Vibration

FMJ™ forms a thick, shock absorbing layer that dampens sound and vibration. No more annoying rattles or noises from drop-in bedliners.

Superior Adhesion

FMJ™ creates an excellent bond with properly prepared surfaces.

- Fast-set; dries in 1 minute or less
- Ready for rugged use within 24 hours
- Can be textured for a non-slip surface
- Eco-friendly; 100% solids with no VOC's or solvents
