Please join SPI for a hands-on demonstration of the remarkable new GRACO® Integrated Reactor Proportioning System. A complete system for polyurethane foam or polyurea applications, the integrated series of Reactor proportioning systems combines an electric Reactor and a diesel generator into one package. Complete turnkey models are also available with an integrated air compressor. Please contact your SPI sales rep for further details.

LOOK WHAT THE INTEGRATED SYSTEM CAN DO FOR YOU:

- Saves diesel fuel costs – on average of \$7,000 annually
- Improves productivity – with advanced, easy to use controls
- Eliminates guesswork – the system is totally engineered and tested by Graco
- Eliminates costly power issues – associated with shore power and low cost generators
- Start spraying sooner – with improved heating capacity
- Improves spray performance – with consistent pressure at the gun
- Saves time – it's easy to install into a spray rig since it's prewired with components already selected and installed
- Reduces fuel costs even more – compact, portable design fits into a smaller
